DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 21-24, drawn to a process for calculating etch bias, classified in class 438, subclass 17.

II. Claims 1-20, drawn to an apparatus (system) for the practice for determining the etch bias, classified in class 313, subclass 309.

Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case unpatentability of the Group I invention would not necessarily imply unpatentability of the Group II invention, since the process as claimed can be practiced by another and materially different apparatus such as Scanning Electron Microscopy.

Because these inventions are distinct for the reasons given above and have acquired a separate status of the art as shown by their different classification, the fields of search are not co-extensive, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b)

Art Unit: 2825

if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

During a telephone conversation with Mr. James K. Dawson, reg. No. 41,701 on June 23, 2004, a provisional election was made with traverse to prosecute the invention of group I, claims 21-24.

Claims 1-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to non-elected invention.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 1-20 are cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James K. Dawson, reg. No. 41,701 on June 24, 2004.

Allowable Subject Matter

Claims 21-24 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 21-24 prior art does not teach a method of calculating etch bias in a semiconductor-processing step, comprising calculating

the etch bias, from the unit area capacitance (or current), the first cathode capacitance (or current) and first cathode width, and the second cathode capacitance (or current) and second cathode width.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
